From the list of coins, select Ripple (XRP). Luno only supports the **XRP Ledger** network. WARNING: Sending on other networks (ERC20, BEP20) will permanently lose funds.
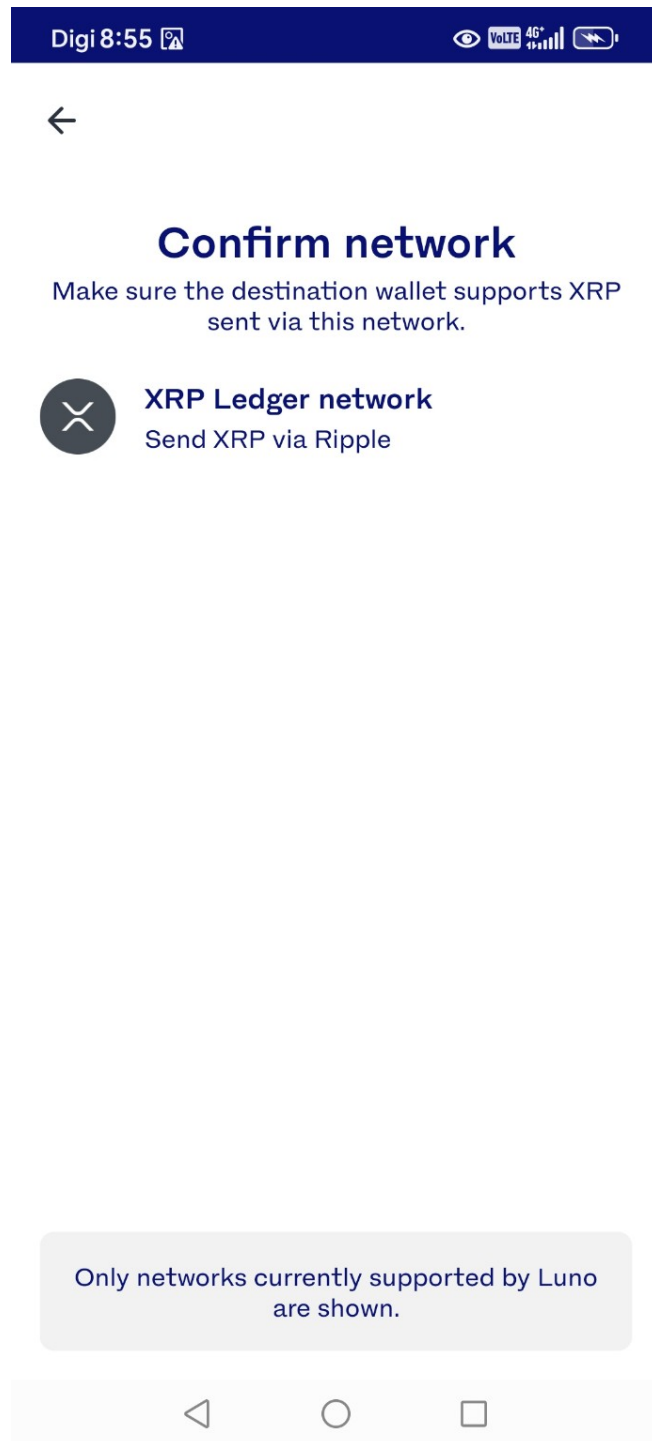

Step 3 - Network Warning

Luno shows: "Avoid losing crypto - make sure the destination wallet supports **XRP Ledger**." Read carefully, then tap Continue with Send.

Step 5 - Enter Amount

Enter the transfer value in **MYR** only (standard: RM10, RM30, RM50). Add a note/reference if needed.

Step 6 - DRB Status (Compliance)

Answer compliance questions: Do you have Domestic Ringgit Borrowing (DRB)? Is the transfer Local or Overseas?

Step 7 - Confirm Address Owner

Double-check the address belongs to the correct type: Always choose "This is someone else's address" for all successors, predecessors, and IgniteX Hive.
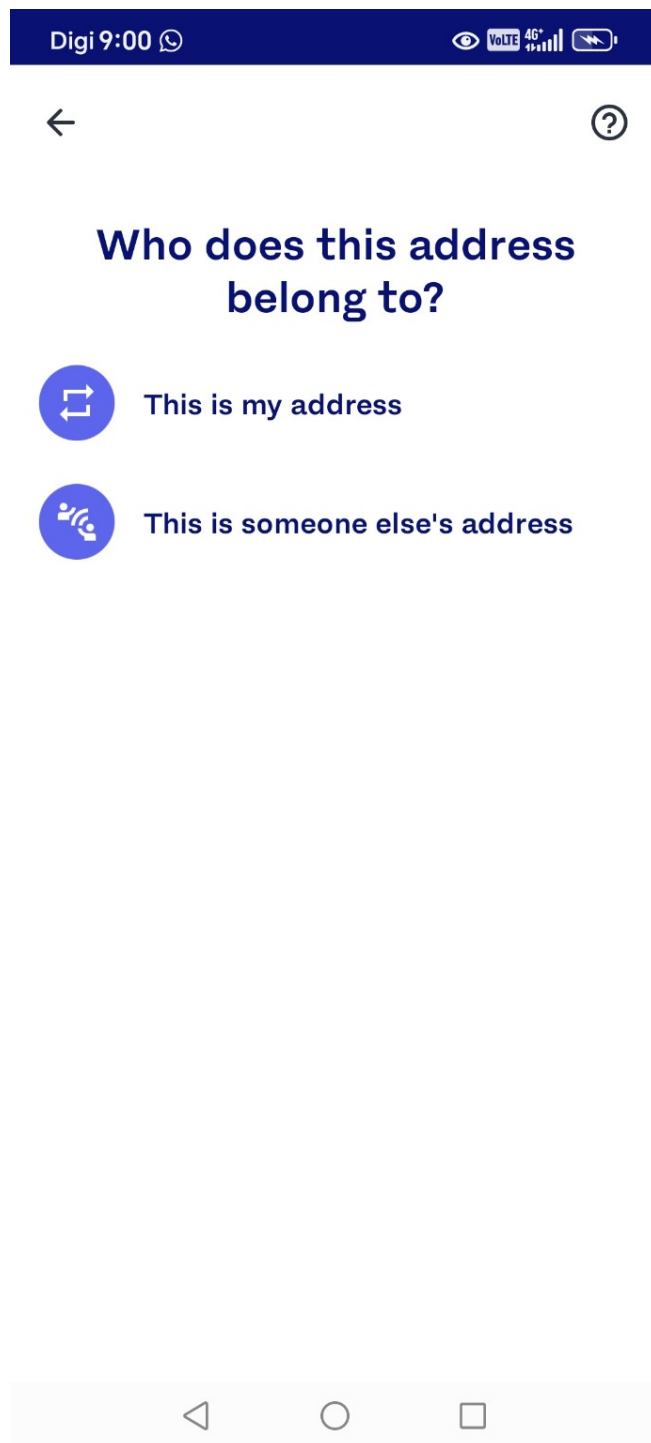

Step 8 - Recipient Type

Select recipient type: Successors & Predecessors -> Always "A person"; IgniteX Hive (Company) -> Always "A business/organisation".

Step 9 - Recipient Details

Enter the recipient's Name and Nationality. For IgniteX Hive, enter company details.
